## 2011 CHIRP Data Report

### CRCSN Notifications Received, with Results of Replies and Communication Type, by Region and Site

October 2009 - September 2010

The accompanying regional office reports show the results of **replies** by *Communication Type* made during the federal fiscal year ending September 30, 2010, to close out CRCSN notifications received by HCP local health agencies from CRCSN. The tables separate the children who are known or unknown to the HCP program at the time of the hospital discharge corresponding to the date of the notification. CRCSN notifications are created from monthly hospital discharge data reported to the Colorado Department of Public Health and Environment by the Colorado Hospital Association.

HCP may receive multiple notifications for the same child that result from multiple hospital discharges and multiple diagnosis codes. HCP receives the first notification for a new client as an "Unknown," which automatically registers the client in the HCP CHIRP database. Subsequent notifications will appear as "Known."

The number of notifications received by a region does not normally equal the same number of replies that regions send back to CRCSN in the same reporting period. The reasons for this are that: a) a single reply can close out multiple notifications; and b) regions have 90 days to reply to notifications, so the dates that notifications are received and replied to may not necessarily fall in the same fiscal year.
